

Premium Health New Women's Health Clinic Brooklyn, NY

**Premium Health of Brooklyn NY
retained DIGroup to design their new
Extension Clinic for Women's Health on
16th Avenue in Brooklyn, NY.**

◀ We designed the signage & graphics throughout

▼ Environmental graphics in exam room

Project Size	18,200 SF Renovation
Project Location	Premium Health 16th Avenue Brooklyn, NY 11230
Project Cost	\$1,200,000
Completion Date	October 2019

The general character of the space was developed by our in-house interior design staff working in concert with Premium senior staff to achieve a sleek spa-like, warm and inviting feel in direct opposition to the typical stark institutional setting of most ambulatory clinics. Custom designed backlit ceiling and wall treatments are featured in the lobby and clinical touchdown space.

The entire clinical space totals approximately 12,700 sf on the fourth floor and was designed and approved as an NYSDOH Article 28 compliant. The fifth floor which totals approximately 5,500 square feet houses the clinic management component of the clinic as well as some public educational spaces designed for community programs such as dietary and fitness education programs.

The program features twenty generously sized exam rooms. Each exam room is designed to maintain patient privacy and dignity by careful placement of exam equipment and access to the rooms. A number of consultation rooms are scattered throughout the space to provide patient and physician quiet space for private discussion.
