

Saddle River Day School Hall of Science and Entrepreneurship Saddle River, NJ

This new academic building is designed to showcase programs in technology, the sciences and entrepreneurship with the purpose of providing spaces for students to explore, innovate and discover their passions.

▲ Student Commons

Project Size 32,000 SF

Occupancy Fall 2025

A new two-story, 32,000 sf, academic building is planned for the Upper School on the Chestnut Hill Road Campus for the school to remain competitive with peer institutions. The building, designed as a beacon to prospective students and families, as well as the community at large, will showcase programs in Technology, Robotics and Entrepreneurship. Its focal point is a large common area and gathering space for up to 400 students at this commuter-based college preparatory school. The design presents a contemporary form contrasting with the stately presence of the nearby mansion that has been an icon in the Borough and the school's first home.
